Rhododendrons—Kalmias—Andromedas—Azaleas and other Ericaceæ—Specimen Evergreens—Trees —Shrubs—Vines—Ferns—Herbaceous Perennials

PRESS OF NEWCOMB & GAUSS, SALEM, MASS.

BOXFORD NURSERY

THIS IS A PRICED CATALOG of my **Boxford Nursery,** located at Boxford, Mass. Here may be seen growing the choicest collection of Specimen Nursery Stock, selected for the most discriminating buyers. Special attention is given to Hardy Native Material, which **must always be the basis of successful permanent plantings.**

SPECIMEN STOCK. There is a growing demand for fine specimen stock in Conifers, Rhododendrons, Kalmias, Andromedas, and other evergreens, and my Boxford Nursery is established to supply just this need which has been felt so long.

PRICES are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely **underground.** Frequent transplanting, and handling specimens with adequate burlaped balls, means success and quick results. It costs more, but it is the fixed policy of my Boxford Nursery; and "cheap" stock will not be handled or sent out. **The Best is always the Cheapest.**

PACKING CHARGES FREE for shipment by Freight or Express. Team and auto delivery to North Shore or Boston points at **net cost.**

At my **HIGHLANDS NURSERY,** Pineola (Saginaw P. O.), North Carolina, 3800 ft. elevation, on the crest of the Alleghany Mountains, one may see Rhododendrons, Azaleas, Leucothoes, Kalmias and Andromedas growing in all sizes by tens of thousands in single species, and nowhere else can be found such a collection of Rare American Plants of unquestionable hardiness—**the best for American Gardens.**

THE CAROLINA MOUNTAINS is the native home of the most beautiful Broad-leaved Evergreens and Ericaceous Shrubs. Highlands Nursery not only ships direct to customers, but is a great propagating plant, supplying material for my Boxford Nursery. A catalog of Highlands Nursery is sent on request.

VISITORS ARE ALWAYS WELCOME at both Nurseries or at my Salem office. Many customers take the trip to my Highlands Nursery in the Carolina Mountains during the blooming season of Rhododendrons and Azaleas. No such show can be seen elsewhere, and it is an outing worth while; I am glad to give details.

KALMIA ANGUSTIFOLIA. Narrow-Leaved Laurel.			
1 to 2 ft. clumps	.75	6.00	
Collected Clumps,	.65	5.00	40.00

LATIFOLIA. Mountain Laurel.

One of the grandest of our native, broad-leaved evergreen shrubs, attaining tree-like proportions in our southern mountains. In cultivation it is a broad, thick shrub, and when in full bloom, of surpassing beauty. The wheel-shaped flowers in close terminal corymbs, pure white to pink, appear in May or June in such profusion as almost to smother the foliage. Its thick, shining leaves, conspicuous the year round, make it a shrub of greatest value for massing. The hardiness of Kalmia latifolia is beyond doubt, it being found sparingly in Nova Scotia and increasingly in abundance through New England and the Middle Atlantic States (particularly in the higher altitudes), till the crest of the Southern Alleghenies is reached.

9 to 12 In.	.40	3.50	30.00

2 to 3 ft. clumps,	3.50	32.50	
LEDUM LATIFOLIUM. Labrador Tea.			
Collected clumps, 9 to 18 In.	.60	5.00	40.00
Collected Plants, 9 to 18 In.	.15	1.00	8.50

LEUCOTHOE CATESBAEI. Catesby's Leucothoë.

3 to 8 feet. Few shrub evergreens of the broad-leaved sort have the grace of this one. Has thick, shining green leaves, evenly disposed on long, recurved branches, and dense racemes of beautiful white, bell-shaped flowers. As an undershrub or for banks and the borders of streams it is without a rival. The sprays make beautiful winter decorations indoors, turning a rich bronze in the fall where exposed to the sun. Over 40,000 plants in my Nurseries.

6 to 12 In. clumps,	.60	5.00	40.00
1 to 1½ ft. clumps,	1.00	8.50	75.00
1½ to 2 ft. clumps,	1.75	15.00	125.00

RHODODENDRONS

RHODODENDRON ARBUTIFOLIUM. Dwarf Rhododendron.

8 to 10 in.	.75	6.00	

CAROLINIANUM (PUNCTATUM), Small or Early Flowering Rhododrendon.

The smallest Alleghanian species, though it often attains a height of 15 feet and is wide spreading. A very graceful shrub, with totally different aspect from the two species preceding. Leaves dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

Until this year we have been sending this beautiful and rare species out under the name of punctatum. Prof. Sargent has recently called attention to the fact that it is a distinct species from the punctatum, differing in time of bloom, with more showy and profuse flowers, and making a much larger and finer plant than the punctatum.

It is now known as Rhododendron carolinianum, being described and named by Alfred Rehder, Arnold Arboretum, Jamaica Plain, Mass.

9 to 12 in.	.75	6.00	50.00
9 to 12 in. clumps,	1.50	12.50	100.00
1 to 1½ ft. clumps,	2.00	17.50	150.00
1½ to 2 ft. clumps,	3.50	32.50	
2 to 3 ft. clumps,	6.00	50.00	

CATAWBIENSE, OF THE CAROLINA MOUNTAINS.

It is this magnificent Rhododendron that over a hundred years ago was introduced into Europe, supplying, together with Rhododendron maximum and R. punctatum, color and hardy blood to the cultivated "hybrids," but with a consequent loss of hardiness; and so today, for American gardens where iron-clad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the Southern Alleghanies, where it attains a height of 20 to 30 feet.

Considering the extreme hardiness, color of flower, compact growth and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known Rhododendron maximum, we can recommend the true native catawbiense as the finest for general use, withstanding exposure and extremes of temperature where other Rhododendrons fail.

Do not confuse this true species, which is absolutely hardy, with the common so-called catawbiense hybrid seedling so freely imported from Europe, which is at best half-hardy, and even when branched above is a single stem, showing bareness underneath for years.

Unlike Rhododendron maximum, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy half-breed imported variety noted above), and as sent out by Highlands Nursery are always on their own roots.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the Northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner Rhododendron maximum and Kalmia latifolia, the value of Rhododendron catawbiense cannot be overestimated.

Do not compare our many-stemmed clumps with the single-stemmed, "bushy" half-hardy Rhododendrons offered by importers. There is no comparison.

	Each	Per 10	Per 100
6 to 9 in.	.30	2.50	22.50

3 to 4 ft. clumps,	6.00	50.00	
4 to 5 ft. clumps,	8.00		

3 to 6 ft. extra specimens $8. to $15. each.

RHODODENDRON FERRUGINEUM. 10 in. .. .50 4.00

ALBUM. 8 in. ..... .75 6.00

HIRSUTUM. 8 to 10 in. ..... .40 3.50

RHODODENDRON MAXIMUM. The great American Rosebay. Perfectly hardy in the latitude of Quebec.

Rhododendron maximum is without doubt the noblest of American broad-leaved shrubs. It is found growing sparingly in New England and New York, more abundantly in the Pennsylvania mountains, but reaching perfection only in the Southern Alleghaney mountains where it grows in such luxuriance as to form a striking feature in the mountain landscape. Its large, waxy white or delicately pink flowers appear in large trusses in July, the latest of all the Rhododendrons, greatly enhancing its ornamental value as a broad-leaved evergreen for finished landscape effect.

Not even in Asia do Rhododendrons grow more luxuriantly than in our Southern Alleghany Mountains, where they attain a height of 30 feet or more. They must be seen in their native lavishness of growth and bloom, on the mountain-sides or hanging over the dashing ice-cold streams and water-falls, to be properly appreciated, and a trip to the high Carolina mountains in spring and early summer is a never-to-be-forgotten series of joys to the lover of nature.

In our northern gardens Rhododendron maximum (and other species to a small extent) is subject to damaging attacks from the lace-wing fly, particularly in sunny locations. It is easily kept in control with an emulsion of five to ten pounds of whale-oil soap and one to two quarts of kerosene to 100 gallons of water, used with a spray pump having a fine nozzle.

9 to 12 in.	.25	2.00	17.50
1 to1½ ft.	.40	3.00	25.00

2 to 3 ft. clumps,	2.50	22.50	
3 to 4 ft. clumps,	4.00	37.50	

4 to 6 ft. specimens, $5. to $10. each.

MYRTIFOLIUM. Myrtle-Leaved Rhododendron. .50 4.00

WILSONI. Dwarf Rhododendron.
30 to 40 in. 1.00 8.50

RHODODENDRON HYBRIDS. Hardiest varieties, including the following: Abraham Lincoln, album elegans, grandiflorum, caractacus, catawbiense alba, everestinaum, General Grant, Mrs. Milner and others according to size and selection, $1.50 to $4.00 each.

Rhododendrons and Kalmias by the Car Load.

Rhododendrons and kalmias delivered at your station by the carload. To be shipped from point determined by me.

For the area covered and effect produced, a "carload" of Rhododendrons or Kalmias is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlapped separately. Don't accept cheap stock, thrown into cars without burlapping and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end.

RHODODENDRON CATAWBIENSE.

Each plant collected from the open and burlapped. Prices f. o. b. your station, if east of the Mississippi River.

Car containing 200 clumps, 1½ to 3½ ft. for	$280.00
Car containing 300 clumps, 1½ to 3½ ft. for	380.00
Car containing 400 clumps, 1½ to 3½ ft. for	480.00
Car containing 600 clumps, 1½ to 3½ ft. for	600.00

Other combinations and sizes quoted on request.

RHODODENDRON MAXIMUM.

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River, "collected" from open ground, and each specimen burlapped separately.

Car containing 300 clumps, 1½ to 4 ft. for $300.00
Car containing 400 clumps, 1½ to 4 ft. for 375.00
Car containing 600 clumps, 1½ to 4 ft. for 500.00

Other sizes or combinations will be made up to suit customers. It is far cheaper to buy my kind at slightly increased price and have plants that will grow.

RHODODENDRON MAXIMUM. Extra specimens.

For those wishing perfect specimens I can supply a few cars of "collected", extremely heavy plants Price on request.

RHODODENDRON MAXIMUM AND R. CATAWBIENSE.

In mixed car, delivered free at any station east of Mississippi River.

Car containing 150 maximum and 150 catawbiense, "collected" as above, 1½ to 4 ft. clumps — a total of 300 — for $490. Car containing 250 maximum and 250 catawbiense, 1½ to 4 ft. clumps — a total of 500 — for $550.00

Kalmia latifolia by carload.

Each specimen burlapped, and highest-class clumps collected" from open, delivered free at your station, if east of Mississippi River.

Car containing 400 clumps, 1 to 3½ ft. for $375. Kalmia may be added to help fill any Rhododendron car at $1.00 per clump.

Best plants for the Rhododendron beds and for ground-cover, grown at my Nurseries.

Some of the most successful are Andromeda polifolia, Chamaedaphne calyculata, Dendrium buxifolium, D. prostratum, Ilex glabra, Gaultheria procumbens, Leucothoë catesbaei, Pieris floribunda, Taxus minor, Galax aphylla, Houstonia serpyllifolia, Mitchella repens, Shortia galacifolia, Vinca minor, V. minor alba, Xanthorrhiza apiifolia, Lilies, Trilliums, Erythroniums, Ferns, Dicentra eximia, Iris, etc.

CAROLINIANA. Carolina Hemlock.

40 to 80 ft. This grand new Hemlock introduced by me possesses a distinct pyramidal growth and attains a height of 40 to 80 feet. Its dense, dark foliage and graceful habit are approached only by the finer Japanese Hemlocks. Some fine specimens are to be seen in the Arnold Arboretum, and are the first plants of this Hemlock ever sent out, being supplied by me to Prof. C. S. Sargent, in 1884.

3 to 6 ft. .....$3 to $15. each.

VACCINIUM MACROCARPON. American Cranberry.

4 to 6 ft.	1.50	12.50	
BIGNONIA CRUCIGERA, Cross Vlne, 1 ft.	.30	2.00	
GRANDIFLORA. Trumpet Vlne, 2 years,	.40	3.50	
RADICANS,	.20	1.75	
CELASTRUS PUNCTATA. 2 to 3 ft.	.30	2.00	17.50
SCANDENS. Blttersweet, 6 to 12 ln.	1.25	10.00	
CLEMATIS APIIFOLIA. Parsley-leaved Clematls, heavy,	.40	3.50	30.00

	Each	Per 10	Per 100
COCCINEA. Scarlet Clematis	.40	3.50	30.00
CRISPA.. Purple Clematis, strong,	.40	3.50	30.00
PANICULATA. Japanese Clematis.			
2 years,	.40	3.50	30.00
3 years,	.60	5.00	45.00
VIRGINIANA. Virgin's Bower. 3 to 4 ft.	.50	4.00	35.00
EUONYMUS RADICANS. Climbing Euonymus, Strong, 2 years,	.40	3.50	30.00
HEDERA HELIX. English Ivy, 2 years.	.50	4.00	
HUMULUS LUPULUS. Hop Vine	.15	1.00	8.00
LONICERA BELGICA. 1 to 2 ft.	.40	3.50	
JAPONICA VAR. HALLIANA. Hall's Honeysuckle. 1 to 2 ft., heavy	.35	3.00	25.00
SEMPERVIRENS. Coral Honeysuckle. 2 to 3 ft.	.40	3.50	
LYCIUM EUROPEUS. Matrimony Vine, 3 years	.20	1.75	15.00
SINENSIS, 3 years	.20	1.75	15.00
PERIPLOCA GRAECA. Silk Vine, 3 years	.35	3.00	25.00
ROSA DOROTHY PERKINS. Well branched	.25	1.75	15.00
FARQUHAR. Well branched	.25	1.75	15.00
LADY GAY. Well branched	.25	1.75	15.00
M. C. EGAN. Well branched	.25	1.75	
MULTIFLORA. Japanese Climbing Rose, 1 year.	.10	.35	3.00
1 to 2 ft.	.25	1.75	
WICHURIANA. Memorial Rose	.35	3.00	25.00
RUBUS LACINIATUS. Cut-leaved Blackberry. 1 to 2 ft.	.45	3.50	
VINCA MAJOR. Larger Periwinkle	.20	1.25	10.00
Perhaps the best of all evergreen ground covers for shady places.			
MINOR. Periwinkle	.20	1.25	10.00
ALBA. White Periwinkle,	.35	2.00	17.50
VITIS CONCORD. Concord Grape. Very heavy	.75	6.00	50.00
WISTERIA MULTIJUGA. Japanese Wisteria, 3 years	.75	6.00	
——ALBA, 3 years	.75	6.00	
——SINENSIS	.75	6.00	
Some extra heavy Wisterias,	2.00		

HARDY HERBACEOUS PLANTS

We are prepared to supply any Hardy Herbaceous Perennials at reasonable prices which fit the quality of stock desired. Weak plants are cheaper but strong clumpy stock is always recommended. Special attention is called to my list of Hardy Ferns.

	Each	Per 10	Per 100	Per 1000
ACTAEA RUBRA. Red Baneberry	$ .40	2.50	20.00	
ASTERS, in variety		1.25	10.00	
BAPTISIA TINCTORIA. Yellow Indigo. Heavy clumps	.30	2.50	15.00	
BICUCULLA (DICENTRA) EXIMIA. Wild Bleeding Heart	.20	1.50	12.00	
SPECTABILE. Bleeding Heart	.35	3.00		
BRODIAEAS should be ordered in summer and in no event later than October 1st. for the current season's shipment.				
CALIFORNICA		.60	4.00	35.00
CAPITA. Blue		30	2.00	15.00
COCCINEA. 5-8 to 1 in. diameter		.60	4.00	35.00
GRANDIFLORA. Blue		.30	2.00	15.00
IXIOIDES SPLENDENS. Very fine yellow		.40	2.50	22.00
LAXA. Fine; blue in umbels		.30	2.00	15.00
PEDUNCULARIS. White. Fine for wet places		.40	2.50	22.00
VOLUBILIS. Twining hyacinth 5 to 8 in. diameter,		.60	4.00	35.00

	Each	Per 10	Per 100	Per 1000
CALOCHORTUS. Should be ordered in summer not later than October 1st. for Fall shipment				
ALBUS. Globe Tulips. Pearly White		.30	2.00	15.00
BENTHAMII. Star Tulips. A charming yellow cup		.30	2.00	15.00

LANDSCAPE DEPARTMENT

VISITS ARE MADE for consultation and advice, to make surveys, designing and planting plans. Entire construction, planting and carrying out of landscape work of all kinds undertaken, and charges will be found reasonable and consistent with good workmanship and permanent results.

THE WILD GARDEN. The basis of all the best landscape work of a permanent nature must be Native Plants and particularly where naturalistic effects are desired If this fact is ignored tame and fleeting results will follow. I make a specialty of WILD GARDENING and my long experience is here of greatest value. Every garden or estate has its own peculiar problems and a discussion of details may prove helpful in unexpected ways.

A SUCCESSFUL RHODODENDRON BED

The first season, Garden of George W. Mieth, Hubbard Woods, Ill., planted Spring 1912 with small size material at total cost of $65.90.

EXACT LIST OF MATERIAL USED

The planting was made from suggestions and stock furnished by me and the edging of violets was supplied from Mr. Mieth's own grounds. The planting is a successful typical grouping of Broad-Leaved Evergreens and "Filler Plants."

1 Rhododendron maximum, 2 to 3 ft. clumps.
3 " " 1½ to 2 ft.
10 " " 1 to 1½ ft. clumps.
1 " punctatum, 1 to 1½ ft. clumps.
2 " catawbiense, 2 to 3 ft. clumps.
10 " " 9 to 18 in. clumps.
5 Kalmia latifolia, 1 to 1½ ft. clumps.
10 " " 6 to 9 in. clumps.
10 Leucothoe catesbaei, 6 to 12 in. clumps.
10 Aronia arbutifolia, 2 to 3 ft.
30 Xanthorrhiza apiifolia, 6 to 12 in. clumps.
5 Enonymus radicans.
1 Ampelopsis englemanni.
25 Dryopteris, in var.
10 Eupatorium ageratoides.
3 Azalea arborescens, 1 to 1½ ft. clumps.
10 " nudiflora, 6 to 12 in. clumps.
5 " vaseyi, 6 to 12 in. clumps.
2 Andromeda floribunda, 6 to 12 in. clumps.
10 Aronia nigra, 1 to 2 ft.
5 Clethra alnifolia, 1 to 2 ft.
1 Chionanthus virginica, 3 to 4 ft.
5 Azalea viscosa, 1½ to 2 ft.
20 Lilium superbum, 1st size.
20 " canadense, 1st size.

Rhododendron catawbiense (true species) growing by thousands at Highlands Nursery, 3800 ft. elevation in the Carolina Mountains.

PLEASE USE THIS ORDER FORM.

To HARLAN P. KELSEY,
SALEM, MASS.

Hardy American Plants and
Carolina Mountain Flowers

*Dated*_____

*Dear Sir:—Enclosed please find $*_____*for which forward the below order selected from Catalog of your HIGHLANDS NURSERY or BOXFORD NURSERY (state which).*

*Ship to*_____

Give full shipping instructions unless you wish to leave to my best judgment. Stote whether by Freight, Express, Wogon or Porcels Post.
